

# ARABIA'S BEST 2010

# Abu Dhabi

Providing an optimal service that is second to none in the region, 5 Pioneers Property Development ensures that its clients, both buyers and sellers, are completely satisfied with not only the process but also the outcome.

Time Towers is an ideal example of one of the company's projects. A true landmark, it has been designed to perfection with stunning architecture and stands in a serene location forming a hub between the main island of Abu Dhabi and Reem Island. The development consists of two underground parking floors, four podiums with retail and parking, two towers – one commercial and the other residential – sitting on the shared podiums and basements.

Elegant and modern in concept, Time Towers' residents will enjoy the benefits of a private building overlooking the ocean on three sides and spacious layouts that combine functionality with aesthetics. Apartments range from studios to a four-bedroom penthouse. Residential amenities are conveniently located on top of the retail and podium, offering a welcome haven from the heat of the sun. These include a gym with male and female Jacuzzis and saunas and an outdoor swimming pool with a wide panoramic view of the sea.

Time Towers successfully merges the best of classic design with all the latest technology needed for modern life to create intelligent and beautiful apartments that ideally suit 21st century living.
